details & date exceptions**

Lived Experience Practitioner?

Clinician? (Mad) Academic?

Service User?

...All welcome 😊

Although our purpose is to support Lived Experience Practitioners in their work through coming together and sharing knowledge - anyone who is interested in joining us is welcome.

The group will consider academic work or 'grey literature' (other writing) authored by academics and authors who write from a lived experiential lens. Details of the articles considered each week will be available on the website. We do a synopsis of the papers at the beginning, so even if you haven't had a chance to read the papers, you will still be able to join in the discussion.
